

Is Ceptara Organizer 3.5 ****only**** compatible to Outlook 2010?

Mon, 07/18/2011 - 09:12 — danher

This might be the "stupid question of the day" but I couldn't find an explicit hint stating that the Ceptara Organizer 3.5 versions are **not** compatible with Outlook 2007, other than a strict interpretation of the release note statement "This version is compatible with Outlook 2010 32 and 64 bit on Windows 32 and 64 bit versions up through Windows 7."

I'm on Windows Vista 32 bit running Outlook 2007 (12.0.6557.5001) SP2 MSO (12.0.6554.5001) with a registered Ceptara Organizer 2007 Version 3.1.1006.2.

Is it safe to upgrade? Do the newer versions benefit those stuck with Outlook 2007?

Thanks!

-Daniel
