Sending Task to employee crashes their Outlook 2010 session

Thu, 04/26/2012 - 22:24 — danemcneill

I tried two different tests creating new tasks that I both assigned a project to and send as an assigned task.

I send one test from my Outlook 2007 laptop and the other from my 2010 and upon receipt of my tests from each of my different laptops and Outlook versions, the employee's Outlook 2010 client crashed.

Suggestions?

‹ Best way to mark email for followup [1] Possible to re-download or re-install without new, second purchase? › [2]
