Kevin Cox, CTO and Partner

Blog [1]

Contact Kevin [2]

Kevin brings a balance of computing talent to Ceptara that guides the product and service development organization. With over 16 years of experience in engineering and software development, Kevin provides leadership in high technology, enterprise level software architecture, web and shrink-wrapped application development. He is focused on delivering creative and professional computing solutions in supporting our overall focus on Excellence.

While Kevin has been engaged in the pursuit of several start-ups, his forte is the development of high performance, scalable, and integrated internet and enterprise applications. Kevin has successfully deployed and maintained several web facing and mission critical applications into production, including online shopping and the international site at AT&T Mobility (formerly Cingular), a web based supply chain channel for EDI transactions for Paccar, a real-time HIPAA compliant portal containing patient insurance eligibility data integrated with multiple health care providers, a systems portal for troubleshooting and debugging TransPoint (now CheckFree), software update capability for downloads to 2.5 million MSN users, and product registration and surveys for Conversay.

Kevin holds a Masters of Science degree in Electrical Engineering with an emphasis on signal processing and control systems from Wright State University in Dayton, Ohio and a Bachelors of Science degree from Embry-Riddle Aeronautical University in Prescott, Arizona.

Learn more about Kevin by reading his blog, following him on Twitter, and visit his LinkedIn profile.
