Cannot install

Wed, 07/18/2012 - 10:51 — anguswa

I am trying to install the application. I am sitting behind a company firewall. The installer is trying to download components which is simply not allowed in our environment.

Is there a binary version that is available to install, and do you publish update binaries?

If not I will need to ask for a refund (rather sadly) at the very first hurdle.
