Ceptara Outlook plugin creating issues with iReport?

Wed, 04/24/2013 - 03:46 — DeinLakai

Dear Ceptara Team,

since I installed the Ceptara Organizer plugin for Outlook, and have it synchronize with Tooddledo ... I am observing a stuck iReport process that consumes an avarage of 30-60% of my CPU for hours ... and only killing it via Task Manager brings the system back to base condition.

Could this be caused by the Ceptara plugin?

Thanks for advise.

Thomas.

‹ [SOLVED] register after trial expiration [1] Toodledo Syncing very slow › [2]
