Lean Six Sigma White Belt Training Material Snippet

Sun, 01/17/2016 - 15:40 — Chris

Ceptara Lean Six Sigma White Belt course is built to educate participants on the basic vocabulary of Lean and Six Sigma and to introduce a few Lean tools. The course covers areas such as; the scientific method, continuous improvement approaches, introduction to theory of constraints, the history and value of Lean and Six Sigma, process management, waste identification, and change management.

The following resource contains a subset of the slides used in the LSS White Belt training.
